OWEN MCMAHON

Information Science · Data Analysis · UX Research

owenthefuture@icloud.com · linkedin.com/in/owen-mcmahon-sf · github.com/owngoldengate · San Francisco & Boulder

Information science student who makes information clearer at the intersection of data, design and how people use technology. Experienced in GIS, Python data analysis, survey research and UX research methods.

EDUCATION

B.S. Information Science

University of Colorado Boulder

Minor in Creative Technology and Design

- Coursework: Information Ecosystems, Designing Interactions, Quantitative Reasoning for Information Science, Visual Literacy and Design, Programming for Information Science

EXPERIENCE

Student Assistant, CIRES

Boulder, CO · Aug 2025 – present

Cooperative Institute for Research in Environmental Sciences, CU Boulder

- Migrated 150+ articles into Helpjuice: converted formats, cleaned text and metadata, selected and sized images, and checked links and formatting
- Tracked migration status in a spreadsheet and kept stakeholders up to date
- Manage front-desk operations and communication systems serving 100+ people daily
- Organize and process internal data and documentation; support systems that distribute information across departments

PROJECTS

Crime and Health Equity in Denver

Team of 4 · Fall 2026

- Spatially joined 318,590 Denver crime reports (2021–2025) to 77 neighborhoods in QGIS and normalized them per km² per year
- Built the team's Tableau dashboard comparing crime with Denver's Health Equity Index; violent crime made up 11.6% of offenses in low-equity neighborhoods vs. 7.0% in high-equity ones

Survey Research: Student AI Usage

Team project · Aug – Dec 2025

- Helped design and distribute a survey to 100+ CU Boulder students on AI use in academics
- Analyzed results in Python with proportions and hypothesis testing, and compared them with national AI-usage trends

UX Research: Screen-Time App Concept

INFO 1121 · Spring 2025

- Ran "5 Whys" interviews to uncover why students abandon screen-time tools; reframed the team's design question and contributed to the concept and pitch

Screen Time, Mood and Productivity Study

Solo · Nov 2025

- Merged two weeks of self-tracked data with Open-Meteo API weather data in pandas and analyzed patterns with six Matplotlib charts

SKILLS

Technical: Python (pandas, Altair, Matplotlib), SQL, Excel (statistical analysis, pivot tables), Power BI, Tableau, QGIS, survey design, UX prototyping, Photoshop

Professional: Data analysis, research methods, problem solving, communication, time management
